UI Palette

A little skyline. A lot of canopy. Eight colors drawn from Atlanta's leafy cityscape, made for warm, grounded team projects.

01 / The core palette

8 SOLID FILLS · HEX = ACTUAL SWATCH COLOR

Color	Hex	Use	Description
Forest ink	#183E2C	Headlines, body text & primary actions	Deep woodland shadows
Canopy	#386342	Secondary actions & dark panels	The evergreen tree line
New leaf	#8DAB50	Highlights, tags & decorative details	Sunlit foliage
Sky mist	#83B9B6	Calm backgrounds & information panels	The hazy Atlanta sky
Golden hour	#F2B544	Small accents & key moments	The late-afternoon sun
Terracotta	#B87950	Editorial accents & illustration	Warm rooftops & brick
Limestone	#D9CDA9	Dividers, borders & quiet surfaces	City stone & cloud shadows
Warm paper	#F6F0DD	Default canvas & reversed text	Soft, cream-colored clouds

02 / Readable by nature

Aa	Forest ink on Warm paper	10.44:1 · AA
Aa	Warm paper on Canopy	6.08:1 · AA
Aa	Forest ink on Sky mist	5.43:1 · AA
Aa	Forest ink on Golden hour	6.50:1 · AA

Ratios shown for solid fills at 100% opacity; all meet WCAG AA for normal text. Keep Leaf and Terracotta decorative. Recheck contrast over imagery.

ATLANTA FIELD GUIDE

GOLDEN HOUR

Take the greener route.

Find a slower side of the city, from shaded trails to skyline views.

Explore the guide ↗

Let neutrals breathe, greens lead and sunlight punctuate. Use accents sparingly; never rely on color alone to communicate meaning.

Data Palette

The city's stories need more than a beautiful palette. Give canopy, heat and historic grades their own visual language—and keep that meaning from map to map.

DATA VISUALIZATION COLOR RULES
Local color variables · editable solid swatches
Scales, legends & selection states

A / Let the values lead

SOLID STOPS = EXACT HEX · SMOOTH BARS = CONTINUOUS LEGENDS

Tree Canopy Coverage

SEQUENTIAL / CONTINUOUS

Light moss means less canopy; deep olive means more. Adopted palette C keeps a fixed 0–100% coverage domain.

Stop	Hex	Variable
0%	#EEF0D5	data/canopy/00
25%	#D0D6A4	data/canopy/25
50%	#A6B574	data/canopy/50
75%	#738647	data/canopy/75
100%	#3D522C	data/canopy/100

0% coverage LOW → HIGH · NEVER REVERSE **100% coverage**

Interpolate continuously between stops; these are anchors, not class breaks. Zero is a valid value—not missing data.

Urban Heat

SEQUENTIAL / CONTINUOUS

Light warm tones to dark burnt orange. Relative low → high only, until metric, unit, time period and shared domain are defined.

Stop	Hex	Variable
Low	#FFF5EB	data/heat/00
¼ ramp	#FDD0A2	data/heat/25
½ ramp	#FDAE6B	data/heat/50
¾ ramp	#E6550D	data/heat/75
High	#7F2704	data/heat/100

Low · relative LOW → HIGH · NEVER REVERSE **High · relative**

Stop names indicate normalized ramp positions, not temperatures or cutoffs. No Atlanta temperature values or observations are implied.

BEFORE A HEAT MAP GOES LIVE

Use the same metric, unit and domain across comparable maps; align time periods or state differences. Production legends must show the metric, unit, numeric min/max and time period.

B / HOLC Grade

CATEGORICAL · NOT A RAMP

Grade	Color	Variable	Hex
A	Green	data/holc/a	#2E7D55
B	Blue	data/holc/b	#3D73A6
C	Yellow	data/holc/c	#E2BD46
D	Red	data/holc/d	#C44E4A

Historical green / blue / yellow / red convention. Always pair fills with A / B / C / D labels. HOLC grades record discriminatory historical classifications—not current neighborhood quality or this project's judgment.

A value is not an absence.

No data
#A7AAA6
data/no-data

Neutral gray means unavailable, not zero. Keep "No data" as a separate legend key, never as the low end of either scale.

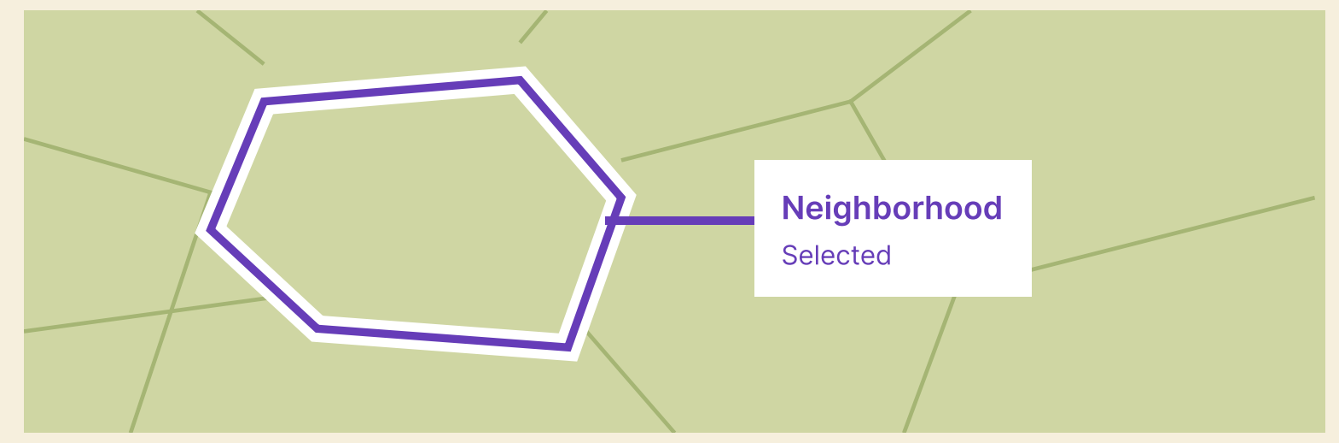
C / Selected Neighborhood

ILLUSTRATIVE SCHEMATICS · NOT ACTUAL ATLANTA OBSERVATIONS

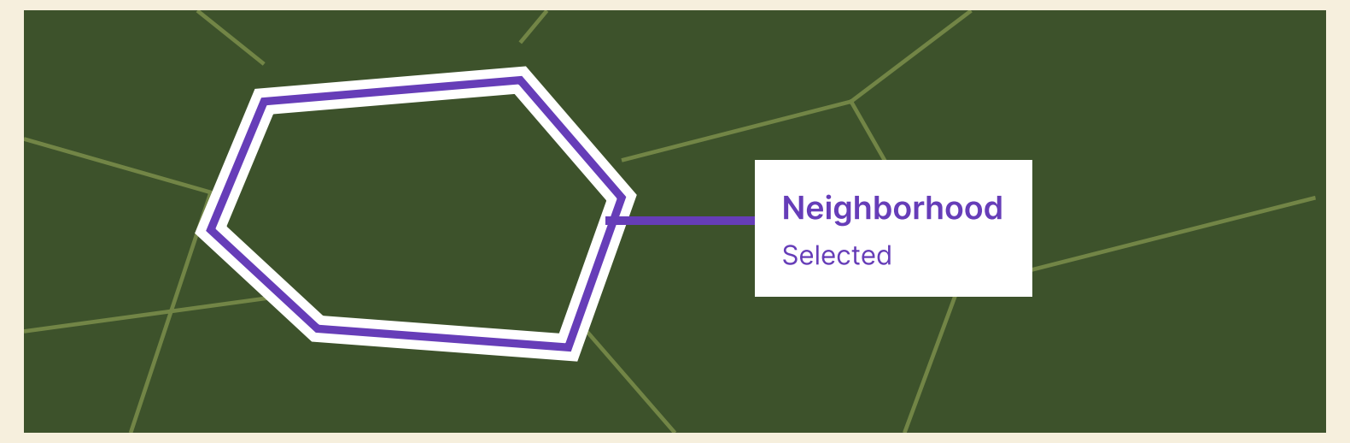
state/selected
#663DB8

3 px purple outline over a 10 px white halo stroke (#FFFFFF). Add a direct label; retain the underlying data fill.

One state across all metrics. Selection is not a data value or a HOLC grade.



Light data fill · original value remains visible



Dark data fill · original value remains visible

NUNITO / LETTERS & NUMERALS
Regular · SemiBold
Bold · ExtraBold

A / Six sizes

NUNITO · ALL SIZES & LINE HEIGHTS IN PX

ELEMENT / LOCAL TEXT STYLE	FONT WEIGHT	DESKTOP SIZE	ACTUAL SPECIMEN / CHOSEN STYLE DEFAULT
Hero Title Hero / Title	ExtraBold 800	72–96 px	A greener city. 80 px size / 88 px line height For longer titles like Atlanta: City in the Forest?, keep the 80/88 px default and review wrap behavior before adjusting.
Section Heading Heading / Section	Bold 700	36–48 px	Room to grow. 40 px size / 48 px line height
Subheading Heading / Subheading	SemiBold 600	22–28 px	A little skyline. A lot of canopy. 24 px size / 32 px line height
Body Text Body / Regular	Regular 400	16–18 px	Follow the shade through a city shaped by trees, shared spaces and the people who call it home. 18 px size / 28 px line height
Button UI / Button	Bold 700	14–16 px	Explore the city 16 px size / 24 px line height
Chart Labels Data / Label	SemiBold 600	12–14 px	Tree canopy coverage · 0% → 100% 13 px size / 18 px line height Prefer 13–14 px for map legends, tooltips and value labels; the initial range remains 12–14 px and the default stays 13 px. Treat 12 px as a dense-chart starting point and assess readability at actual display size. Do not keep shrinking text to fit more data.

A starting point, not a rule. Ranges are provisional design guidance—not responsive sizing built into one Figma style. Each local style stores one fixed size and line height. Adjust after testing the webpage layout and screen sizes.
